*"Having a wireless network just work is kind of refreshing"*

Miles Davis, IT Director, Stanford University Computer Science Department

## From crowded lecture halls and dormitories to satellite campuses, Meraki's cloud networking was built for the demands of higher education

- 802.11n wireless access points are optimized for dense lecture halls and campus-wide deployments
- Meraki is iPad ready, with complete visibility and control over users and mobile devices
- Application management is built in: block unwanted BitTorrent, limit YouTube, and prioritize educational apps
- With intuitive cloud-based management and self provisioning, self-optimizing, and self-healing hardware, Meraki is easy to deploy and manage without training or dedicated staff
- Connect and manage satellite campuses with cloud managed branch gateways
- Meraki's cloud architecture saves 50% over traditional solutions by eliminating hardware-based WiFi controllers

*See for yourself - free evaluations available*

## Hundreds of educational institutions rely on Meraki

18,000 customer networks worldwide, from small colleges to major universities
